

ENERGY and ENVIROMENTAL POLICY

As Orjin Teknik Yönetim Hizmetleri A.Ş., a company operating in the management of business centers and facilities, we are committed to the following principles:

- To implement an energy and environmental management system in our operational and technical activities within the scope of our services,
- To establish and implement appropriate goals and objectives related to the Energy and Environmental Management System,
- To provide all necessary information and resources to achieve these goals and objectives,
- To comply with all legal requirements and standards related to energy efficiency, energy use, energy consumption, and environmental protection,
- To ensure continuous improvement in the effectiveness of the Energy and Environmental Management System without compromising our service quality,
- To consider energy efficiency as one of the evaluation criteria in the procurement of products and services,
- To design and support initiatives that promote energy efficiency,
- To take the necessary measures regarding greenhouse gases and global warming, adopting a sustainable policy to leave a livable world for future generations,
- To provide continuous training to our employees to raise awareness of energy efficiency, energy saving, and environmental protection

We hereby commit to these principles.
